### Invoice Sales Analysis - How to send it to Excel?

#19

Have you ever wanted to analyze all of your Invoice's sales in an Excel spreadsheet for graphing or charting? WMS has an export function to do just that, here's how:

- What you are going to analyze is all of the data from an **Invoice Date** range you choose,

- And from the Invoice's Detail section.

City	Item Product	Qty	Unit Price	Disc%	Disc	Price	PST	GST	Total
	1 Sel Argentine Malbec		\$110.95	0%	\$0.00	\$110.95	\$0.00	\$0.00	\$110.95
	1 6wk Equip Charge/Service		\$42.00	0%	\$0.00	\$42.00	\$0.00	\$2.00	\$42.00
									\$152.95

- From the **Main Switchboard**, select the **Accounting Switchboard** and then select the **Export Menu**.

- Press the **Export Line Items** button

- A **Date Range** form will be displayed prompting you for the dates you want to analyze

- Fill in the **Beginning and Ending Dates**

- Press the **Export...** button

- You will be prompted as *where* to put this exported excel data
- In this example, we choose the **Desktop** of this PC. Note that the selection background is highlighted.

- A message will be displayed confirming the export of the spreadsheet data.
- In this case, the file is called “**WMS2000 Line Items – 01-01-2010 – 04-30-2010**”
- As well, the location of the file is indicated, in this example, “**C:\Users\ld\Desktop**”

- Minimize the **WMS** program and open your spreadsheet program, then find and open the file located on your desktop, “**WMS2000 Line Items – 01-01-2010 – 04-30-2010**”.
- It should look something like this below, and with **Excel**, you can graph, group and filter your data.

Inv	Date	Product	Prod #	Type	Qty	Price	Disc	Tax1	Tax2	Tax3	Tax4	Total
